

# The Art of Rounds- Creo Parametric

## Training Course Description

1 day course

---

### Summary

This one day class focuses on understanding the capabilities and the application of the Round features in a wide range of topologies for special edges and surfaces. The workshop dives into typical use cases, Round techniques and strategies. Students gain a deeper understanding of what a Round feature can do and how to best apply it in difficult and complex scenarios.

**Software:** Creo Parametric

### Course Topics

- Understanding Rounds
- Round Techniques
- Custom Round Techniques

### Recommended prerequisites for this Creo Parametric Training Course

Introduction to Creo Parametric or equivalent Creo Parametric experience; Advanced Modeling; Surfacing; and knowledge of assemblies.
